If your Rogers modem offers dual-band support, you have two networks to choose from. [Learn more.](#)

HOW TO CONNECT TO YOUR ROGERS MODEM

The screenshot shows a web browser window with two tabs: "Connect to Wi-Fi" and "Rogers Easy Connect". The address bar shows the URL "www.gstatic.com/selfinstall/index.html#finish". A red notification bar at the top states "LastPass was unable to contact the login server, so you are now in offline mode. Some functionality may be limited." Below this is the Rogers logo and a language selector set to "English". A teal progress bar at the top indicates the setup steps: "Testing" (checked), "Wi-Fi Setup" (checked), and "Done" (active). The main content area features the heading "You're all set!" and a sub-heading "You're all set!". Below this, a text block reads: "Your modem will now disconnect to complete the setup. To connect to the Internet, go to your device's Wi-Fi settings and connect to your new home networks:". To the left of this text is an image of a white Rogers modem with a green checkmark overlay. To the right, a white box contains the following network information: "2.4 GHz Network MYNAME", "5 GHz Network: MYNAME-5G", and "Password 12345678". Below this box is a red "Close" button. A red arrow points from the text "Click Close" to the "Close" button. At the bottom of the page, a red heading "Remember this password!" is followed by the text "It's also the new password to access your modem's settings. And don't forget to connect". The Windows taskbar is visible at the bottom of the screen.
